INTRODUCTION

These guidelines are revised annually for the benefit of those persons charged with the task of conducting the co-curricular programs of the KPSD. It is hoped that these guidelines will simplify some of the problems that may arise and assist administrators and sponsors (especially new personnel) in working with the activities which enhance the learning of our students.

KPSAA acknowledges that the diversity of the Borough's schools, the distances between them, and the differences in size and instructional design make it most impractical for all activity programs to be subjected to one mandatory system of participation.

INFORMATION REGARDING INTRAMURALS

Intramural guidelines are developed by the Kenai Peninsula Schools Activities Association for the purpose of establishing the manner in which schools conduct intramurals.

Intramural activities provide an equal opportunity for all students in grades 4-6 to:

- a. participate in activities
- b. develop an awareness of individual and team sports
- c. enjoy sports
- d. practice good sportsmanship

These guidelines will assist elementary schools in maintaining appropriate and safe intramural activities.

Elementary Schools have the flexibility to conduct other intramural activities not listed in the handbook. All schools conducting intramural activities should adhere to established procedures for filling stipend positions and follow KPSAA activity philosophy.

Intramural coaches are encouraged to work with volunteer parents and high school/college students in conducting intramural programs. KPSAA suggests that intramural supervisors coordinate and observe volunteers in an effort to maintain district activity philosophy. Scheduling the number of intramural activity sessions per week is a local building decision.

In order to facilitate the number of students participating in intramural activities and to meet student skill levels, schools may adjust National Federation of State High School Association Rules for sport activities. Exceptions to rules as developed by KPSAA are established due to student safety and skill development needs, and may NOT be modified. Intramural teams may be scheduled to play games with intramural teams from another school in order to encourage maximum student participation, to support student enjoyment of the activity, and to provide an environment in which good sportsmanship skills are applied. In keeping with District activity philosophy at the elementary level, all-star type teams are not permitted.

I. PHILOSOPHY STATEMENT

The Kenai Peninsula Borough School District believes co-curricular activities are an integral part of the educational program. Activities shall be tailored to the physical, mental, emotional and social maturity levels of the youth participating in them. We believe each student should have an opportunity to participate in a broad number of activities based on his/her own talents and interests. It is the intent of the District to encourage participation in activities. District sponsored co-curricular activities shall be approved by the board, administered by the Kenai Peninsula School Activities Association, and supervised by the building administrator.

Emphasis shall be given to the ideals of sportsmanship, fair play, and ethical conduct by students, coaches or advisors, and spectators.

Participation in activities is a privilege to be granted to those students who meet the minimum standards of eligibility adopted by the KPBSD and those additional standards established by each school for its own students.

PHILOSOPHY

ELEMENTARY

The primary goal of all elementary co-curricular programs shall be the involvement of the maximum numbers of participants. Individual involvement along with the principles of sportsmanship, teamwork, and commitment shall be emphasized while developing skills relative to the programs offered. The concept of "having fun" in a safe and healthy environment should be considered the first priority.

Activities will be primarily intramural in nature. Travel for elementary activities will not be funded by the Kenai Peninsula Borough School District.

MIDDLE LEVEL

The primary goal of the middle level co-curricular programs is to encourage student participation and to afford individual students the opportunity to further develop the skills required to participate in their chosen activities.

Priority should be given to the development of individual abilities while emphasizing the concept of "having fun" in a safe and healthy environment within the framework of furthering the principles of sportsmanship, teamwork, and commitment to a goal.

The district provides opportunities for students to participate in co-curricular activities with emphasis on intramural activities. An interscholastic program will be conducted in conjunction with an intramural activity as appropriate.

HIGH SCHOOL

The primary goal of the high school co-curricular program is to involve students in district sponsored activities that serve their interests and talents. These programs should promote positive attitudes through active participation, individual improvement, healthy competition, and the involvement of the community.

High School co-curricular programs focus on interscholastic competition as appropriate. Emphasis shall be given to skill development, principals of sportsmanship, teamwork, commitment to a goal, and "having fun" in a safe and healthy environment.

Interschool activity programs shall be conducted in accordance with law, policy, school handbooks and the Elementary Activities Handbook, Middle School Activities Handbook, or High School Activities Handbook

Activity handbooks shall be reviewed by the Kenai Peninsula School Activities Association and approved annually by the Board of Education.

II. KPSAA AUTHORITY

The KPBSD activity guidelines and other KPBSD pertinent policies govern all co-curricular activities. Co-curricular activities shall be defined as those activities for which a supervisor is provided a specific salary to supervise a specific activity. The specific name of the specific activity shall be clearly designated on the co-curricular contract of the supervisor. For purposes of clarification, co-curricular activities are divided into (1) athletic-related co-curricular activities and (2) non-athletic co-curricular activities.

All policies contained in this document and KPBSD policies apply to participants in **athletic-related activities** in which students participate.

All policies contained in this document and KPBSD policies apply to participants in **non-athletic-related activities** representing the KPBSD at school-sponsored, on- and off-campus events.

III. ENFORCEMENT OF GUIDELINE POLICIES/APPEALS

A. Student Infraction/KPSAA Policy Due Process

1. LEVEL I Suspensions from Athletic Teams for Violation of Handbook Regulations.

When a school has cause to believe that a student has violated law, policy, regulation or school district activity handbook rules that could result in suspension from a team for the remainder of the season, the administrator or his designee shall conduct a hearing that meets the following due process conditions:

Prior to any disciplinary action taken the student shall be provided:

1. Oral or written notice of the charges.
2. An explanation of the evidence if the student denies the charges.
3. An opportunity to present the student's view of the incident.

A student charged with a rule violation may continue to participate until a determination is made in each case by a school official. An informal hearing shall be held as soon as knowledge of a violation is known to the school. The student's parent shall be notified orally and in writing of the decision prior to the student's removal from any team or as soon afterward as practical.

Students suspended from athletic teams shall not be permitted to participate in other school-related or school supervised activities following removal by the unit administrator from one activity until other provisions of activity guidelines are fulfilled, or until an appeal filed by the student or his parent, causes the removal to be overturned.

The unit administrator shall be reasonably free to determine what evidence shall be considered and the weight given to it. Hearsay evidence is not excluded on those grounds alone. Activity participation may be denied when there is relevant evidence to the extent that a reasonable mind might accept as adequate to support the conclusion that a violation occurred.

Reinstatement to participation must follow provisions elsewhere in this handbook in order that a student may regain privileges withheld.

The student or parent may appeal this decision within five (5) school days to:

2. LEVEL II Appeals of Unit Administrator Decision for Student Infractions

The Executive Secretary of KPSAA shall, upon request for an appeal of a level one decision, conduct a fact-finding investigation within three (3) days of such a request. Every reasonable attempt will be made to review the charges, evidence and testimony of all parties relevant to the case. The Executive Secretary of KPSAA shall act as an impartial third party.

The Executive Secretary shall:

1. Examine the charges against the student.
2. Review the procedure used in making the ruling by the unit administrator or school official.
3. Allow presentation by the administration of the evidence used in determining guilt.
4. Allow an opportunity for the student or parent of the student to cross-examine the administration and examine relevant evidence.
5. Provide an opportunity for both sides to have witnesses present and to call witnesses to testify on their behalf.

A written hearing report shall be made available within three (3) school days. The student or parent may further appeal within five (5) school days to:

3. LEVEL III KPSAA Board Appeal of Athletic Suspension

The Executive Secretary of KPSAA shall notify the appealing party within three (3) days of the date when such a hearing with the KPSAA Board will take place. The KPSAA hearing will be scheduled at the next regularly scheduled meeting.

A written hearing report shall be made available within three (3) school days. The student or parent may further appeal within five (5) school days to:

4. LEVEL IV School Board Appeal of Athletic Suspension

The school board or their designee shall within three (3) school days notify the appealing party of the date when such appeal hearing shall be conducted. In most cases this would be the next regularly scheduled school board meeting from the time such request was made or no later than forty-five (45) days from the time of the alleged incident.

Procedures for such hearings shall follow normal school board practice.

All procedures past the unit administrator may be tape recorded to provide a record of fact for further reference. These tapes will be made available to both parties if requested.

B. School Infractions/KPSAA Policy Appeals

These would include a coach, an administrator, or any circumstance when a school or person responsible to the guideline policies is in violation or opposition to KPSAA policy.

- 1. Level I** The school principal will investigate infraction to determine if the situation was a violation.
- 2. Level II** The KPSAA Executive Secretary (or designee) investigates and consults with the building administrator to reach a solution.
- 3. Level III** The KPSAA President will serve as a hearing officer for the KPSAA Board upon receiving an appeal by the principal of a school or aggrieved party.
- 4. Level IV** The KPBSD Board of Education will serve as a hearing board.

C. Potential Penalties

- 1. Student infractions.** Please refer to Section V., Participation Guidelines for Activities
- 2. School infractions**
 - a. Letter of reprimand
 - b. Seeding opportunities
 - c. Forfeiture of contest
 - d. Temporary suspension of the coach or team participation
 - e. Temporary termination of an activity

IV. STUDENT ELIGIBILITY

A. Parent/Student Responsibilities for Participation

1. **Physician's clearance**
 - a. It is recommended that a physician's clearance for sport activities be on file with the coach and the athletic director or principal.
 - b. For wrestling, the initial weigh-ins must be recorded by the coach and the records kept on file in the principal's office prior to the start of the season.
2. **Permission form.** A permission form (Appendix A/Co-curricular Participation Consent Form/Elementary School Warning, Assumption of Risk and Hold Harmless Agreement) signed by a parent/legal guardian must be on file with the coach and the athletic director or principal that:

 - b. Gives parent/legal guardian transportation authorization.
 - c. Indicates parent/legal guardian responsibility for health/accident insurance.
 - d. Gives parent/legal guardian consent for emergency treatment.
3. **User fee.** A user fee may be charged by the school (Appendix B/Elementary School Intramural Participation Fee Form). If the school chooses to charge the fee, payment must be received prior to beginning the activity or a waiver request must be on file with the principal.
4. **Records.** All records must be in order, and all forms must be on file before the student is eligible to participate in any program.

B. Student Requirements for Participation

1. **Attendance.** In order to participate in a school-sponsored activity (including practice), students must attend all classes on the day of the school activity or on the last regular day of the week for weekend activities unless otherwise excused by the school.
2. **School grade**
 - a. Only students in the fourth, fifth, and sixth grades may participate.
 - b. Individual schools may elect to delete grade(s) when appropriate to program(s).
 - c. Schools may elect to limit intramural competition to sixth grade students, to fifth and sixth grade students, or other configurations involving fourth grade students due to numbers of players wanting to participate.
 - d. KPSAA recommends that: The formation of co-ed teams IS NOT discouraged FOR INTRAMURALS.

3. **Sessions.** During intramural sessions, play may be stopped at any time for the supervisor to provide and reinforce basic skill development and to offer new instruction.
4. **Borough tournaments.** Only students enrolled in the public schools of the KPBSD (including District Correspondence/Connections Program) or students participating in a school intramural program culminating with a Borough tournament may participate in the Borough tournaments. This includes students enrolled in Borough-approved programs.
5. **Enrollment.** Participation in school intramurals is not contingent upon enrollment in the district. Participation is based upon space availability as determined by either the principal or the site based council.

C. Student Scholastic Eligibility for Participation

1. **Academic progress** (Optional and may be used for intramurals.)
 - a. Initial eligibility is based on passing cumulative quarter grades.
 - b. Academic standing will be checked weekly.
 - 1) Ineligibility begins the Monday following grade check.
 - 2) Students are ineligible from the Monday following grade check to the next Monday (one calendar week).
2. **Personal conduct.** Classroom conduct may affect eligibility. Any misconduct affecting eligibility must be recorded in the principal's office.

Concussion Information

(BP/AR 6145.22)

As medical management of sports-related concussion continues to evolve. Recently, there has been a significant amount of new research regarding sports-related concussions in high school athletes.

The Kenai Peninsula School District (KPBSD) seeks to provide a safe return to activity for all athletes following any injury, but particularly after a concussion/head injury. In order to effectively and consistently manage these injuries, procedures have been developed to aid in insuring that concussed athletes:

- are identified, treated and referred appropriately,
- receive appropriate follow-up medical care during the school day (including academic accommodations), and
- are fully recovered prior to returning to activity.

According to Alaska state law, **any student suspected of having a concussion must be immediately removed from play.** The student must be evaluated by a health-care provider who is qualified in the diagnosis and treatment of concussion before he/she can return to play. This return-to-play (RTP) form has been developed in an effort to create a standard protocol among KPBSD schools defining the step-by-step process by which students suspected of having a head injury may progressively return to full school participation, inclusive of both cognitive and athletic activities.

ASAA Parent's Guide to Concussions in Sports (Revised 04/14)**What is a concussion?**

- A concussion is a brain injury which results in a temporary disruption of normal brain function. The injury occurs when the brain is violently rocked back and forth or twisted inside the skull as a result of a direct or indirect force. An athlete does not have to lose consciousness ("knocked-out") to suffer a concussion. In fact only 3-10% of concussions do produce loss of consciousness.

Concussion Facts

- It is estimated that over 250,000 high school athletes across the United States suffer a concussion each year. (Data from NFHS Injury Surveillance System, 2010-2011). The CDC estimates 5.5 million sports concussions occur annually in the United States (CDC, 2011)
- Concussions occur most frequently in hockey and football, but girls' soccer, boys' soccer, and girls' basketball follow closely behind. All athletes are at risk.
- A concussion is a traumatic injury to the brain.
- Concussion symptoms may last from a few days to many months.
- Concussions can cause symptoms which interfere with school, work, and social life.
- An athlete should not return to sports when still having symptoms from a concussion as they are at risk for prolonging symptoms and at risk for sustaining additional, more serious, brain injury.
- A concussion may cause multiple symptoms. Many symptoms appear immediately after the injury, while others may develop over the next several days or weeks. The symptoms may be subtle and are often difficult to recognize.

What are the signs and symptoms of a concussion?

SIGNS OBSERVED BY PARENTS, FRIENDS, TEACHERS OR COACHES	SYMPTOMS REPORTED BY ATHLETE

What should I do if I think my child has had a concussion?

If an athlete is suspected of having a concussion, he or she must be immediately removed from play, be it a game or practice Alaska Statute requires that (1) a student who is suspected of having sustained a concussion during a practice or game shall be immediately removed from the practice or game and (2) a student who has been removed from participation in a practice or game for a suspicion of a concussion may not return to participation in practice or game play until the student has been evaluated and cleared for participation in writing by an athletic trainer or other qualified person who has received training, as verified in writing or electronically by the qualified person, in the evaluation and management of concussions.

Continuing to participate in physical activity after a concussion can lead to worsening concussion symptoms, increased risk for further injury, and even death. Parents, coaches, and officials are not expected to be able to "diagnose" a concussion, as that is the job of a medical professional. However, you must be aware of the signs and symptoms of a concussion. And, if you suspect a concussion, then your child must stop playing:

When in doubt, sit them out!

All athletes who sustain a concussion need to be evaluated by a health care professional who is familiar with sports concussions. You should call your child's physician and explain what has happened and follow your physician's instructions. If your child is vomiting, has a severe headache, is having difficulty staying awake or answering simple questions he or she should be taken to the emergency department.

When can an athlete return to play following a concussion?

After it is determined that an athlete has suffered a concussion, the athlete may not return to play or participate until the athlete has completed the ASAA Return to Play Protocol. Previously, athletes were allowed to return to play if their symptoms resolved within 15 minutes of the injury. Studies have shown us that the young brain does not recover quickly enough for an athlete to return to activity safely in such a short time.

Concerns over athletes returning to play too quickly have led state lawmakers, in Alaska and most other states, to pass laws stating **that no player shall return to play following a suspicion of concussion on that same day and the athlete must be cleared by an appropriate health care professional before they are allowed to return to play in practices or games.** The laws also mandate that coaches receive education on recognizing the signs and symptoms of concussion.

Where an athlete is evaluated as having suffered a concussion, only when an athlete has been completely free of concussion symptoms for 24 hours, are they eligible to begin the Return to Play Protocol. The athlete should proceed with activity in a step-wise fashion to allow the brain to re-adjust to exertion. There is a minimum of 24 hours between steps in the Protocol. Some athletes complete one step each day. An individual athlete may be guided through the Protocol more slowly if they are at risk for prolonged concussion or additional brain injury. If symptoms recur during exercise, then exercise is ended and begins the next day at the preceding day's level.

Concussion Return to Play Protocol (ASAA, 2/18/2012)

- Symptomatic Stage:
- Physical and Cognitive Rest.
- Then Incremental Cognitive Work, without Provoking Symptoms.

- If no symptoms, then:
 - Day 1:
 - Begin when symptom free for 24 hours.
 - 15 min **light aerobic** activity (walk, swim, stationary bike, no resistance training).
- If no symptoms, then:
 - Day 2:
 - 30 min **light-mod aerobic** activity (jog, more intense walk, swim, stationary bike, no resistance training).
 - Start PE Class at previous day's activity level.
 - As RTP Protocol activity level increases, PE activity level remains one day behind.
- If no symptoms, then:
 - Day 3:
 - 30 min **mod-heavy aerobic** activity (run, swim, cycle, skate, Nordic ski, no resistance training).
- If no symptoms, then:
 - Day 4:
 - 30 min **heavy aerobic** (hard run, swim, cycle, skate, Nordic ski).
 - 15 min **Resistance Training** (push-up, sit-up, weightlifting)
- If no symptoms, then:
 - Day 5:
 - **Return to Practice, Non-contact Limited Participation** (Routine sport specific drills).
 - If no symptoms, then:
 - Day 6:
 - **Return to Full-Contact Practice**
 - If no symptoms, then:
 - Day 7:
 - **Medically Eligible for Competition when completes RTP Protocol and is cleared by Healthcare Professional**
 - **ASAA Eligibility Criteria** must be met before return to competition.

If symptoms recur at any step, the athlete should cease activity and be reevaluated by their health care provider.

How can a concussion affect schoolwork?

Following a concussion, many athletes have difficulty with cognitive work: thinking, focusing attention, calculating, attending school, doing homework, taking tests. These problems may last from days to months and often involve difficulties with short and long-term memory, concentration, and organization.

Following concussion, athletes should begin with a period of rest, in which they avoid cognitive work. As concussion symptoms diminish and the athlete feels able, he/she can begin trials of cognitive work, e.g. reading, texting, computer, TV, videos, school. The introduction of cognitive work should be in short increments which increase progressively in length, so long as symptoms do not recur or worsen with the work. For example, start with 30 minutes of computer time, and, if symptoms do not worsen, try one hour later in the day. If several hours of cognitive work are well tolerated at home, try attending a half day of school. When a full day of school is tolerated add homework.

Academic accommodations may be necessary for students attempting to attend school when they still have concussion symptoms. In many cases it is best to lessen the athlete's class load early on after the injury. This may include staying home from school for a few days, followed by a lightened schedule for a few days, or perhaps a longer period of time, if needed. Decreasing the stress on the brain early on after a concussion may lessen symptoms and shorten the recovery time. If cognitive work at any time provokes or exacerbates symptoms, then the work should be discontinued and there should be cognitive rest until the symptoms subside. The student can attempt to advance cognitive work again on the day following resolution of the increased symptoms.

What can I do?

- Learn to recognize the "Signs and Symptoms" of concussion as listed above.
- Emphasize to administrators, coaches, and other parents your concerns and expectations about concussion and safe play.
- Teach your athlete to tell the coaching staff if the athlete suspects that they or a teammate has a concussion.
- Monitor sports equipment for safety, fit, and maintenance.
- Ask teachers to monitor any decrease in grades or changes in behavior that could indicate concussion.
- Report concussions that occurred during the school year or over the summer to appropriate school staff. This will help in monitoring and protecting injured athletes as they move to the next season's sports.

Why is it so important that an athlete not return to play until they have completely recovered from a concussion?

Athletes who are not fully recovered from an initial concussion are significantly vulnerable for recurrent, cumulative, and even catastrophic consequences of a second concussive injury. The risk of such difficulties is diminished if the athlete is allowed time to recover from the concussion and return to play decisions are carefully made. No athlete should return-to-sport or other physical activity when symptoms of concussion are present.

Is a "CAT scan" or MRI needed to diagnose a concussion?

Diagnostic imaging tests, which include CT ("CAT") and MRI scans, are rarely needed following a concussion. While these are helpful in identifying life-threatening brain injuries (e.g. skull fracture, bleeding, swelling), the tests are typically normal, even in athletes who have sustained a severe concussion. A concussion is diagnosed based upon the athlete's story of the injury and a physical examination.

What is the best treatment to help my child recover more quickly from a concussion?

The best treatment for a concussion is rest. There are no medications that can speed the recovery from a concussion. Exposure to loud noises, bright lights, computers, video games, television and phones (including text messaging) all may worsen the symptoms of a concussion. You should allow your child to rest as much as possible in the days following a concussion. As the symptoms lessen, you can allow increased access to computers, video games, etc., but the access must be lessened if symptoms worsen.

How long do the symptoms of a concussion usually last?

The symptoms of a concussion will usually go away within two weeks of the initial injury. However, in some cases, symptoms may last for several weeks, or even months. Symptoms such as headache, memory problems, poor concentration, and mood changes can interfere with school, work, and social interactions. The potential for such long-term symptoms and disability underscores the need for careful management of all concussions.

How many concussions can an athlete have before he or she should stop playing sports?

There is no “magic number” of concussions that determine when an athlete should give up playing contact or collision sports. The circumstances surrounding each individual injury, such as mechanism of injury and length of symptoms following the concussion, are very important and must be considered when assessing an athlete’s risk for further and potentially more serious concussions. The decision to “retire” from sports can only be reached following a thorough review of the athlete’s concussion history, coupled with a thorough and frank discussion between you, your doctor, and your child.

I've read recently that concussions may cause long-term brain damage in professional athletes. Is this a risk for high school athletes who have had a concussion?

The issue of “chronic encephalopathy” in some former NFL and NHL players has received much media attention. Very little is known about what may be causing dramatic abnormalities in their brains. These players had long professional careers after playing in high school and college. In most cases, they played more than 20 years and suffered multiple concussions in addition to thousands of other blows to their heads. Alcohol, steroid, and other drug use may also have contributed to the brain changes. The average high school athlete does not accumulate nearly the number of potentially injurious blows to the brain as a professional player. But we know that the teenage brain is much more vulnerable to injury and to more severe injury than the older brain. And the fact that we know very little about the long-term effects of concussions in young athletes is further reason to very carefully manage each and every concussion.

What will happen when my child completes the Return To Play Protocol?

When the Return to Play Protocol has been successfully completed, the athlete will be examined by the responsible healthcare provider. Additional tests may be appropriate. The provider will sign a medical clearance to resume competition. The Return To Play Protocol together with medical examination is the internationally recognized process by which concussed athletes are returned to athletic participation as safely as possible. Completing the Return to Play Protocol and medical examination does not mean that the brain has fully recovered from concussion or that there is not risk in returning to competition. But it is the safest way that physicians know at this time. Participation in athletics is accompanied by risk of injury, permanent disability, and death. Having recently sustained a concussion, an athlete is at increased risk for another head injury. Once the athlete is medically eligible to return to competition, the parent and athlete will be asked to sign consent, accepting the risk in returning to play.

ASAA Parent and Student Acknowledgement and Consent

E 6145.22(2)

The Kenai Peninsula Borough School District requires that each athlete, and each athlete's parent/guardian, receive a copy of its guide entitled "A Parent's Guide to Concussion in Sports". This guide sets forth a description of the nature and risks of Concussion.

Parents and athlete should review the Guide, discuss it at home, and direct any questions to the coach, school nurse, or activities principal.

Parents and athletes need to annually acknowledge receipt of "A Parent's Guide to Concussion in Sports", and understand its contents.

As interpreted by ASAA, Athletic Trainer means a Certified Athletic Trainer. **KPBSD Policy AR 6145.22 does not allow trainers to sign**
As interpreted by ASAA, "Trained" means that the provider:

- 1) Has completed the online CDC Concussion Course for Clinicians (www.preventingconcussions.org) in the last two years,
AND
- 2) Has **a)** completed 2 hours of CME in Sports Concussion Management in the last 2 years, or **b)** has completed a one-year Sports Medicine Fellowship, a Certifacate of Added Qualifications in Sports Medicine, or a Residency in Neurology or Neurosurgery.

IF YOU DO NOT MEET THESE CRITERIA, PLEASE REFER THE STUDENT ATHLETE TO A HEALTHCARE PROVIDER WHO DOES

If an athlete is removed from participation in an activity because of a suspected concussion:

BUT is found **not to have a concussion**, the athlete's return to play should be determined by the athlete's medical provider in accordance with the provider's assessment of the athlete's condition and readiness to participate;

AND is **determined to have sustained a concussion**, the athlete's readiness to return to participation should be assessed in accordance with the Alaska School Activities Association's graduated Return to Play (RTP) protocol. All student athletes with a concussion must successfully complete an appropriate RTP Protocol that lasts a minimum of six days before resuming full athletic activity. The Return to Play protocol recommended by ASAA's Sports Medicine Advisory Committee is described below.

Students should begin with a period of complete rest in which they avoid cognitive and physical exertion. As symptoms diminish, and the athlete feels able, he/she can begin trials of cognitive work, e.g. reading, texting, computer, TV, school. The introduction of cognitive work should be in short increments which increase progressively in length and intensity so long as concussion symptoms do not recur or worsen. When several hours of cognitive work are well tolerated at home, then attendance at a half day of school is appropriate. When a full day of school is tolerated, then homework may be added. Academic accommodations may be necessary for student athletes as they return to school following a concussion. If cognitive work at any time provokes or exacerbates symptoms, then the work should be discontinued, additional cognitive work should be minimized until symptoms regress, and the student can attempt to advance cognitive work again on the following day.

Only when the concussion symptoms have been entirely absent for 24 hours, does Day 1 of the progressive return to physical activity begin. The **Return To Play Protocol** is to take place over a **minimum of six days, with at least 24 hours between each step**. The rate of progression through the steps in the program should be individualized. Factors which may slow the rate are young age, history of previous concussions, number/severity/duration of concussion symptoms, medical risk factors, and the concussion risk of the sports to which the athlete will return. Physical or cognitive activity that provokes recurrence of concussive symptoms will delay recovery and increase the risk of future concussion. Therefore, if symptoms recur at any step, then physical activity should stop until 24 hours after resolution of the symptoms, and then resume at the previous step.

SECTION 3: ATHLETE AND PARENT CONSENT

The **Return to Play Protocol** incorporates an internationally recognized process by which concussed athletes are returned to athletic participation as safely as possible. Participation in athletics is accompanied by the risk of injury, permanent disability, and death. Having recently sustained a concussion, an athlete is at more risk for another head injury with risk of permanent disability or death. By signing this form, the athlete and the parent indicate their understanding that the completion of the **Return to Play Protocol** is not a guarantee of safe return to athletic participation. The parent accepts the risk of additional injury in requesting and consenting to the athlete's return to athletic participation.

SUDDEN CARDIAC ARREST

PARENT & STUDENT INFORMATION SHEET

Sudden Cardiac Arrest (SCA) takes the lives of thousands of students every year. It is the number one cause of death in student athletes. SCA is where the heart stops beating suddenly. An individual will stop breathing and collapse, lying motionless or appearing to have a seizure.

CAUSES OF SCA INCLUDE:

- Structural heart defects (hypertrophic cardiomyopathy, Marfan syndrome etc.)
- Electrical Heart Defects (long QT syndrome, Wolff-Parkinson White Syndrome, etc.)
- Blow to the chest (Commotio Cordis)

RISK FACTORS FOR SCA INCLUDE:

- Fainting or seizures during or immediately following exercise
- Chests pains during exercise
- Unexplained shortness of breath, long time to catch breath
- Dizziness
- Unusually rapid heart rate
- Extreme fatigue, always tired and lack of energy
- Unexplained sudden death of a direct family member under the age of 50

If you have any of the risk factors consult your healthcare provider

TO INCREASE THE CHANCES OF SURVIVING SCA THERE SHOULD BE:

1. An Emergency Action Plan in place for every practice and event
2. Someone immediately calling 911
3. An Automated External Defibrillator (AED) immediately accessible
4. Cardiopulmonary Resuscitation (CPR) hands only started immediately

I have reviewed and understand the symptoms and warning signs of SCA

KENAI PENINSULA BOROUGH SCHOOL DISTRICT Elementary School Activities Guidelines

I. PHILOSOPHY STATEMENT

The Kenai Peninsula Borough School District believes co-curricular activities are an integral part of the educational program. Activities shall be tailored to the physical, mental, emotional and social maturity levels of the youth participating in them. We believe each student should have an opportunity to participate in a broad number of activities based on his/her own talents and interests. It is the intent of the District to encourage participation in activities. District sponsored co-curricular activities shall be approved by the Board of Education, administered by the Kenai Peninsula School Activities Association, and supervised by the building administrator.

Emphasis shall be given to the ideals of sportsmanship, fair play, and ethical conduct by students, coaches or advisors, and spectators.

Participation in activities is a privilege to be granted to those students who meet the minimum standards of eligibility adopted by the KPBSD and those additional standards established by each school for its own students.

The primary goal of all elementary co-curricular programs shall be the involvement of the maximum numbers of participants. Individual involvement along with the principles of sportsmanship, teamwork and commitment shall be emphasized while developing skills relative to the programs offered. The concept of "having fun" in a safe and healthy environment should be considered the first priority.

Have you received a waiver in another activity this year?

Yes _____ No _____

Participation fees have become necessary as the budget for providing co-curricular activities has steadily declined. This revenue is used to supplement reduced travel money, official costs, and replacement of equipment and uniforms. If you will not be able to pay the participation fee for this activity, are you willing to complete tasks assigned by the coach or athletic director to compensate for the lack of revenue? Such tasks may include working in concession stands, taking tickets, cleaning or washing activity vans, etc.

PROCEDURES FOR DEALING WITH BODILY FLUIDS AS RELATED TO HIV & HEPATITIS B

BLEEDING DURING A GAME OR PRACTICE:

Whenever a participant suffers a laceration or wound where oozing or bleeding occurs, the practice or game should be stopped and the player should be escorted from the playing area for the appropriate treatment. The student-athlete should not return to the practice/game until the bleeding has been stopped and the open wound properly covered. **Have students clean up their own blood whenever possible.**

PROCEDURES FOR CLOTHING CONTAMINATED WITH BLOOD OR FLUIDS:

During a game or practice, if uniforms and other clothing become saturated with blood or other body fluids containing visible blood, to the extent that the blood could be transferred from one person to another by touch, that part of the uniform should be changed and the skin cleaned with soap and water or antiseptic towelettes. Upon removal of the clothing, the item(s) should be placed in a plastic bag and sealed until laundering. Clearly mark the plastic bag so those handling it know that it contains items soiled with blood.

Items soiled with blood, or body fluids containing visible blood, should be handled as little as possible. These items do not need to be washed separately. A normal laundry cycle may be used according to the washer and detergent manufacturer's recommendations. Hot water is not necessary for decontamination purposes.

Properly discard plastic bag that laundry was in.

Protective gloves should be worn anytime another person's blood is involved and throughout this entire process. Gloves need to be changed and discarded after contact with each student athlete. Remove gloves and discard if they are not of the general-purpose utility variety. Wash your hands immediately even though protective gloves are worn.

When it is not feasible to wash your hands immediately after exposure, an antiseptic cleaner in conjunction with clean cloth/paper towels or antiseptic towelettes should be used. Hands should then be washed in soap and water as soon as possible.

PROCEDURES FOR CLEANING WASHABLE SURFACES CONTAMINATED WITH BLOOD OR BODY FLUIDS:

- A. **For small areas of contamination** (i.e. droplets on wrestling mat, gym floor, pool deck, etc.)
1. Have immediately available a squirt or spray bottle containing **fresh** bleach solution or an EPA-approved disinfectant. (The fresh bleach solution should be mixed daily and should be a dilution of 1 part bleach to 100 parts water. This is the equivalent of 1/4-cup bleach to each gallon of water or 1 tablespoon bleach to each quart of water.) An approved disinfectant that we have in stock is QT. We would recommend its use, especially on wrestling mats.

Do not use bleach together with any other disinfectant.

2. While wearing protective gloves, spray the contaminated area with the cleaning solution. Gloves used for cleaning contaminated surfaces may be single-use latex gloves, or multiple-use general-purpose utility (rubber) gloves. Use disposable towels to clean the contaminated surface. Repeat until all visible blood and other body fluids have been removed. Use clean disposable towels each time the procedure is repeated.
3. Properly discard all contaminated disposable materials.

4. Wash hands as described in the above procedure. When it is not feasible to wash your hands immediately after exposure, an antiseptic in conjunction with clean cloth/paper towels or antiseptic towelettes should be used. Hands should then be washed in soap and water as soon as feasible.

B. **For large areas of contamination** (i.e. large pools of blood, vomitus or urine):

1. While wearing protective gloves, use **fresh** bleach solution or an EPA-approved disinfectant. (The fresh bleach solution should be mixed fresh daily and should be a dilution of 100 parts water to 1 part bleach. This is the equivalent of 1/4-cup bleach to each gallon of water or 1 tablespoon bleach to each quart of water.) (QT is an EPA approved disinfectant which is stocked in our warehouse.)
2. When using mops, a two-bucket system is recommended - one bucket to wash the soiled surface and one bucket to rinse. Detailed instructions are as follows:
 - In bucket #1, dip, wring and mop up blood or body fluids containing visible blood.
 - Dip and wring in bucket #1 and mop a second time.
 - Dip and wring out mop in bucket #1.
 - Dip and wring mop in bucket #2 that contains clean disinfectant.
 - Mop contaminated area again.
 - Rinse and wring mop again in bucket #2.
3. Properly dispose of the used cleaning solution from both buckets down a drainpipe immediately after each occurrence.
4. Soak the mop in a fresh bleach solution or EPA-approved germicide immediately after use. (We recommend QT, which we stock in the warehouse.)
5. Rinse both buckets in fresh bleach solution or an EPA-approved disinfectant after use. After rinsing the buckets, rinse the sink.
6. Remove gloves and discard if they are not of the general-purpose utility variety. General purpose utility (rubber) gloves may be disinfected and reused, but should be discarded if they are peeling, cracked, discolored or if they have punctures, tears or evidence of deterioration.
7. Wash hands immediately even though protective gloves are worn. When it is not feasible to wash your hands immediately after exposure, an antiseptic cleaner in conjunction with clean cloth/paper towels or antiseptic towelettes should be used. Hands should then be washed in soap and water as soon as possible.

APPENDIX L

COMMUNICABLE DISEASE PRECAUTIONS

While risk of one athlete infecting another with HIV/AIDS during competition is close to non-existent, there is greater risk that other blood borne infectious diseases can be transmitted. For example, Hepatitis B can be present in blood as well as in other body fluids. Precautions for reducing the potential for transmission of these infectious agents should include, but not be limited to, the following:

1. Routine use of latex gloves or other precautions to prevent skin and mucous membrane exposure when contact with blood or other body fluids is anticipated.
2. Immediately wash hands and other skin surfaces if contaminated (in contact) with blood or other body fluids. Wash hands immediately after removing gloves.
3. The bloodied portion of the uniform must be properly disinfected or the uniform changed before the athlete may participate.
4. Clean all blood-contaminated surfaces and equipment with a solution made from a 1-100 dilution of household bleach or other disinfectants before competition resumes.
5. Practice proper disposal procedures to prevent injuries caused by needles, scalpels and other sharp instruments or devices.
6. Although saliva has not been implicated in HIV transmission, to minimize the need for emergency mouth-to-mouth resuscitation, mouthpieces, resuscitation bags or other ventilation devices should be available for use.
7. Athletic trainers/coaches with bleeding or oozing skin conditions should refrain from all direct athletic care until the condition resolves.
8. Contaminated towels should be properly disposed of or disinfected.
9. Follow acceptable guidelines in the immediate control of bleeding and when handling bloody dressings, mouth guards and other articles containing body fluids.
10. Have kit prepared and available at the bench for all practices and contests.
Cleaning solution
Gloves
CPR Mouthpiece, etc.
Plastic bags for disposal
Antiseptic towelettes
Disposable towels
11. All officials should carry a pair of gloves in their pocket, i.e. referees, coaches, trainers, etc.
12. Refer to the specific sport rules for additional information.
