Meeting was called to order at 2:10 p.m. by Mr. George Navarre, Borough Chairman, who presided. After a few opening remarks he turned the meeting over to Mr. Sears.

Mr. Sears introduced Mr. Earl Fullingim, representing E. B. Crittenden, whose firm has made a survey of the Borough Schools. Mr. Fullingim stated that an official report will be forthcoming shortly. The final recommendations can now be made. This survey is of existing facilities, their capacity, present condition, site, and feasibility of expansion. An effort has been made to determine what future needs will be and to anticipate the school enrollment increases through 1971.

Estimates have been made using enrollment figures since 1960, and projecting this information into a construction program for 1967-71.

Building recommendations have been made to conform with State Fire Marshal Codes and Alaska Department of Health and Welfare Standards, as a base for the expansion program. This includes 25 students per classroom in elementary schools, adequate plumbing facilities, fire escapes, etc.

This report does not include schools at Tyonek, Port Graham or English Bay.

Based on school enrollment increases for the years 1967-71, a proposed school construction program of 22 projects has been made, to cover a five-year period. These include:

Mr. Fullingim stated that it is desirable to have a consulting architect to coordinate the entire building program, so that certain standardizations will be done, such as uniform window and door sizes to expedite replacements. Answering a question from an Assembly Member, he explained that equipment costs include furnishings.

Mr. Ross asked what is the goal of the type of Education that the District wants, in regard to size of schools.

Mr. Sears explained that 600 to 750 pupils in a high school has been confirmed by a number of educators as the desirable size. There would be two Junior High Schools to each High School under ideal conditions.

Mr. Lentz asked why we are concerned about building so many small schools? Wouldn't it be cheaper to build more centralized larger schools with better facilities and transport the students?

Mr. Sears replied that consideration has been given, that there are two definite schools of thought on this question, and the middle group thought 750 students would be best.

Mr. Simonds pointed out the possibility that the expanding industry on the Peninsula could move south of Kenai, and the population would shift where the jobs are. In view of the uncertainty it might be economically safer to change the order of building priorities, and do less building in the first two years. He asked if the program was based on what we now know, or what we are guessing.

Mr. Fullingim replied that it was based on past population growth, and that the survey would be a continuing thing, so that plans can be adjusted according to current needs. He pointed out that the Soldotna Elementary School is crowded already. Multi-purpose rooms in other schools are needed right away. Up-grading of schools to modern standards are needed now. Kenai Elementary School needs are required this fall. Kenai High School recommendations are needed this fall. The same is true for Seldovia, Seward and Homer.

Mr. Seaman stated that then this program is to catch up on past deficiencies as well as to provide for present needs.

Mr. Atkins of Seldovia asked if any consideration had been given to a plan of using the schools for 12 months, staggering the school year for various groups of students. Mr. Sears replied this has been considered. Some schools use the plan, others have used it and have discontinued it as unworkable.

Mr. Seaman asked how many re-locatable classrooms are available now? Are we planning to get more rooms to have on hand and not wait until they are needed, and have to wait for delivery as in the case of Seldovia. Mr. Sears replied that the request for more re-locatable classrooms is in the budget.

Mr. Lentz suggested a date be set for a work session of the Assembly and the School Board, to work out the building requirements.

Mr. Simonds said that the School Board and the Architect have already decided what is needed. Now the Borough Assembly must decide on a policy of financing.

Mr. Sears stated that the proposed school construction program must be kept flexible, and although as presented it shows what the Board believes to be the present needs, it may be that future developments will require changes. Keeping this in mind, the program, as it stands is the recommendation of the School Board.

Mr. Navarre stated that the recommendations would be put on the agenda of the Borough Assembly meeting of February 3, 1967.

Meeting adjourned at 3:45 p.m.
