EOY DISCUSSION: [5/2/2018

Record Discussion Notes Here

Relevance Goal: Experience a personalized learning system. Key Discussion Questions:

- In what ways do we create a flexible instructional model that meets the needs and interests of each learner? In what
- ways might we improve?

 How do we help our students to develop healthy lifestyles and make healthy choices?
- How can our school better engage families and leverage resources beyond the classroom?

Tustumena, Cooper Landing, Moose Pass, and Hope Schools have continued to meet during each of our collaboration times and Personalized Learning professional development sessions. Each teacher has successfulling designed personalized learning units including room design, learning focus, and assessment. All designs had a focus on flexible instruction and had elements of student choice. The opportunity of student choice is related to learning how to make healthy choices. Choices is related to learning now to make neatiny choices. Choices that relate to the student's learning style and most successful learning environment. Families have been kept aware of the teacher professional development communicated by building newsletters. Families continue to give input on resources and interests. All four schools are part of "Wave 2" and will be introducing Personalized Learning Units at the beginning of the 2018-19 school year.
