

Career and Technical Education Parent Permission Form

Dear Parent:

As part of our vocational/career & technical education program, your son or daughter will have the opportunity to operate various types of power machinery. We would like to stress that, before a student is allowed to operate power tools:

1. S/he will be instructed in the safe use of each power tool s/he will be allowed to use.
2. S/he must pass a safety test specific to that power tool.
3. His/her operating procedures will be checked by the teacher.
4. S/he will be supervised while operating the equipment.

We want you to know that student's safety is of utmost importance. It is continually stressed in our department and throughout the school. We feel that we have a good track record in the prevention of student injury in vocational/career and technical education classes. We want to maintain this high level of safety awareness and accident prevention.

In order for us to have an awareness of your knowledge of your child's activities, we must have your consent before allowing your child to use any power equipment. We invite you to visit the school laboratories at any time. Please check through the school office prior to any visitations.

If you have any questions or concerns I can be reached at:

_____ phone
_____ email

Sincerely yours,

I give my permission for _____ to use power equipment in the vocational/career & technical education program at _____ School.
